Word problems – capacity

Six friends are comparing how much water and juice they drink in one week. Use this table to answer the questions.

Child	Amount of water drunk (ml)	Amount of juice drunk (ml)
William	4 850	210
Abigail	2 250	3 750
Tyler	970	4 100
Ruby	5 090	420
Evie	3 220	5 250
Max	4 180	1 365

Which child drank the most in total? _____

How much more juice did Evie drink than Tyler? _____

Who drank exactly twice as much juice as William? _____

How much water did the children drink in total, in litres? _____

How much less juice did Max drink than water? _____

Who drank exactly 6l altogether? _____

Which of the children drank the same amount of water as Abigail and Tyler added together? _____
