

Converting years into months

Use the table to answer questions about how long each family has lived in their house.

Answer sheet

Family	Time they have lived in their houses	
	years and months	total number of months
The Clarks	4 years, 2 months	50
The Sears	7 years, 9 months	93
The Coles	12 years, 1 month	145
The Brooks	11 years, 5 months	137
The Khans	9 years, 10 months	118

1. Fill in the table to convert the years and months, into **months**.

2. How much longer have the Coles lived in their house than the Brooks family have in theirs? 8 months

3. For how long in **years and months** have the Khans and the Brooks lived at their houses in total?

20 years, 15 months = 21 years, 3 months

4. Write the names in order of time that they have lived in their houses. (Longest first.) The Coles,

the Brooks, the Khans, the Sears, the Clarks
