

Word problems – capacity

Answer sheet

Six friends recorded how much water and juice they drank in one week. Use this table to answer the questions.

Child	Amount of water drunk (ml)	Amount of juice drunk (ml)
William	4 850	210
Abigail	2 250	3 750
Tyler	970	4 100
Ruby	5 090	420
Evie	3 220	5 250
Max	4 180	1 365

Which child drank the most in total? Evie

How much more juice did Evie drink than Tyler? 1 150ml

Who drank exactly twice as much juice as William? Ruby

How much water did the children drink in total, in litres? 20.56l

How much less juice did Max drink than water? 2 815ml

Who drank exactly 6l altogether? Abigail

Which of the children drank the same amount of water as Abigail and Tyler added together? Evie
