

Name: _____ Date: _____

Comparing data

Six friends compared how much water and juice they drank in one week. Use this table to answer the questions.

Child	Water drunk (ml)	Juice drunk (ml)
William	4 850	210
Abigail	2 250	3 750
Aftab	970	4 100
Ruby	5 090	420
Evie	3 220	5 250
Max	4 180	1 365

Which child drank the most altogether? _____

How much more juice did Evie drink than Aftab? _____

Who drank exactly twice as much juice as William? _____

How much water did the children drink in total, in litres? _____

How much less juice did Max drink than water? _____

Who drank exactly 6 litres altogether? _____

Which child drank the same amount of water as Abigail and Aftab added together? _____
