## Comparing heights and masses

Use the measurements to answer the questions below

| Child                                                                                      | Height<br>in cm | Mass<br>in kg |
|--------------------------------------------------------------------------------------------|-----------------|---------------|
|  Harper   | 120             | 22.5          |
|  Scott    | 125             | 23            |
|  Tilly    | 116             | 21            |
|  Patrick | 127             | 23.5          |
|  Adrian | 124             | 22            |

Which child weighs the least? \_\_\_\_\_

What is the total height of  
Scott and Adrian added together? \_\_\_\_\_

Which two children  
weigh more than Harper? \_\_\_\_\_

Who is tallest of the children? \_\_\_\_\_

Write the children in order of their masses, from the **lightest**  
to **heaviest**. \_\_\_\_\_
