

Answer sheet

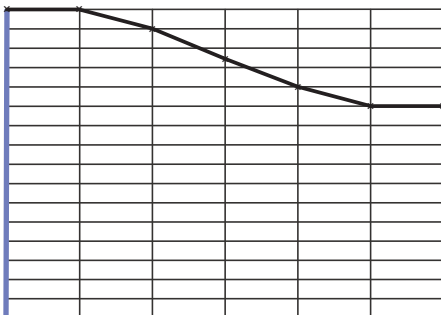

Each graph shows the changes in temperature measured in the classroom throughout 3 different days this week. Match the description to the correct graph.

The heater had been put on early so the room was very hot to start with. Gradually, the temperature cooled off but it never got too cold.

The temperature started off quite warm and steadily rose to stay at its hottest. It only fell by a small amount later on.

It was cold to begin with but the room got warm when the heater came on. When the heater broke, it became cold again quickly.

Draw a line graph to show the temperature changes in the classroom on a 4th day, which are described below.

Typical
graph
pattern

It started off hot so the windows were opened and a fan brought in, to quickly cool the room. It stayed cool for the rest of the day.
