

Short division - remainders as decimals

Set out each division as shown in the first example

Answer sheet

1. $682 \div 4$

$$\begin{array}{r} 170.5 \\ 4 \overline{) 682.0} \end{array}$$

Answer = 170.5

2. $954 \div 8$

$$\begin{array}{r} 119.25 \\ 8 \overline{) 954.00} \end{array}$$

Answer = 119.25

3. $739 \div 5$

$$\begin{array}{r} 147.8 \\ 5 \overline{) 739.0} \end{array}$$

Answer = 147.8

4. $135 \div 6$

$$\begin{array}{r} 22.5 \\ 6 \overline{) 135.0} \end{array}$$

Answer = 22.5

5. $597 \div 2$

$$\begin{array}{r} 298.5 \\ 2 \overline{) 597.0} \end{array}$$

Answer = 298.5

6. $426 \div 5$

$$\begin{array}{r} 85.2 \\ 5 \overline{) 426.0} \end{array}$$

Answer = 85.2

7. $858 \div 8$

$$\begin{array}{r} 107.25 \\ 8 \overline{) 858.00} \end{array}$$

Answer = 107.25

8. $711 \div 6$

$$\begin{array}{r} 118.5 \\ 6 \overline{) 711.0} \end{array}$$

Answer = 118.5
