

Subtracting mixed numbers

Express the answers in their simplest form

Answer sheet

$$3\frac{11}{12} - 2\frac{3}{4} = 1\frac{11-9}{12} = 1\frac{2}{12}$$

$$1\frac{1}{6}$$

$$5\frac{3}{4} - 4\frac{1}{2} = 1\frac{3-2}{4}$$

$$1\frac{1}{4}$$

$$3\frac{9}{14} - 1\frac{3}{7} = 2\frac{9-6}{14}$$

$$2\frac{3}{14}$$

$$6\frac{3}{5} - 2\frac{3}{10} = 4\frac{6-3}{10}$$

$$4\frac{3}{10}$$

$$4\frac{7}{16} - 1\frac{1}{4} = 3\frac{7-4}{16}$$

$$3\frac{3}{16}$$

$$3\frac{7}{12} - 2\frac{1}{6} = 1\frac{7-2}{12}$$

$$1\frac{5}{12}$$

$$7\frac{1}{4} - 3\frac{1}{16} = 4\frac{4-1}{16}$$

$$4\frac{3}{16}$$

$$5\frac{3}{4} - 2\frac{5}{8} = 3\frac{6-5}{8}$$

$$3\frac{1}{8}$$

$$8\frac{11}{18} - 5\frac{4}{9} = 3\frac{11-8}{18} = 3\frac{3}{18}$$

$$3\frac{1}{6}$$
