

Name: _____ Date: _____

Properties of 3D shapes

cylinder

hexagonal
prism

triangular
prism

1. Which 3D shape has two faces that are circles?

2. Which 2D shapes make up the faces of the hexagonal prism?

3. Which of the 3D shapes above, has the most vertices?

4. How many faces does the triangular prism have?

5. Which of these 3D shapes does not have any vertices?

6. How many vertices are there in the triangular prism?

circle

triangle

square

rectangle

pentagon
